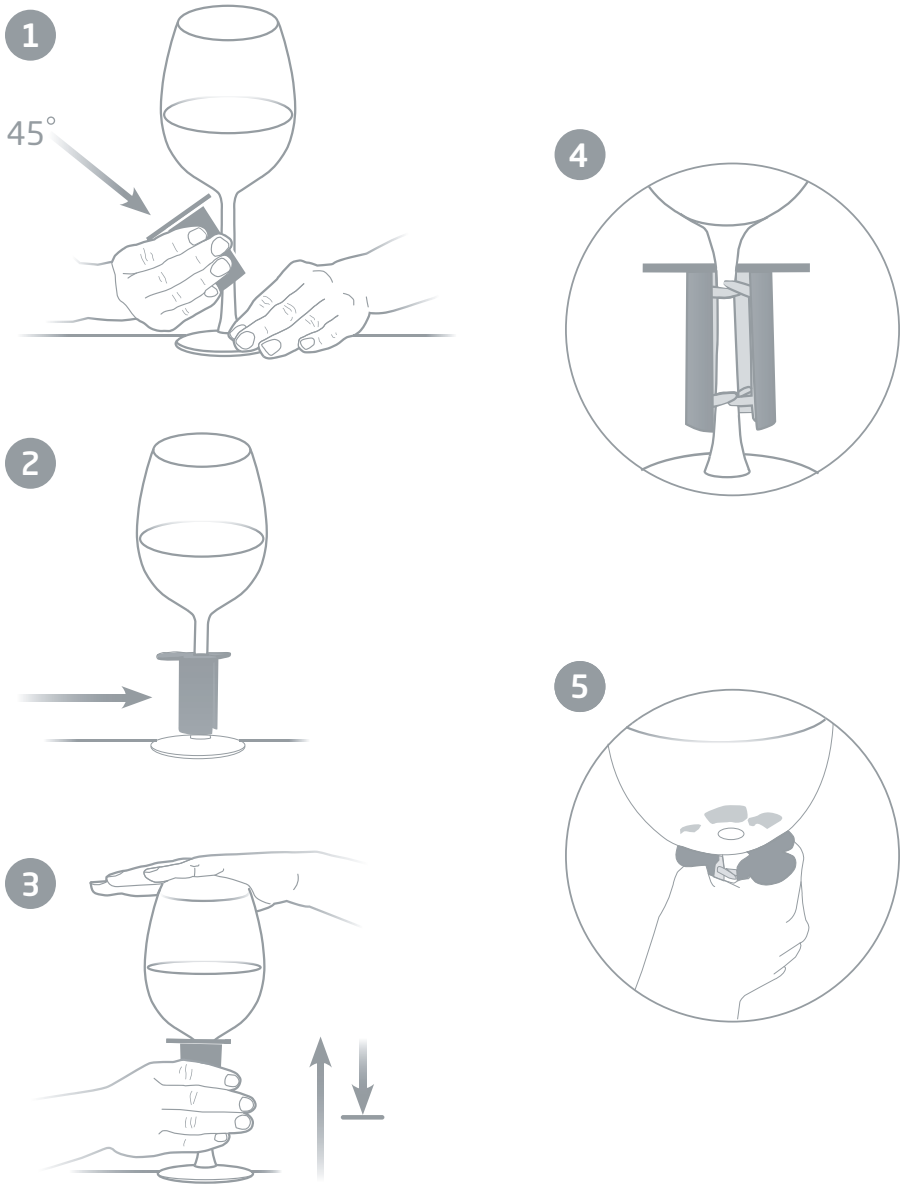
User manual

Festivity Grip enhancer

AGIDE



1. Angle the Festivity Grip enhancer 45 degrees towards the stem of the glass. Attached the Grip enhancer's lower grips first around the stem and then the upper grips.
2. Press the Grip enhancer towards the stem.
3. Slide the Grip enhancer up to the cup of the glass and then down to the middle of the stem so that the grips will get in the right position.
4. The outer grips on the upper row and the lower row should be overlapping each other on the stem to give a safe and steady grip, see pic.4.
5. Place the opening of the Grip enhancer inward to the hand to lock it around the glass while using it.

Festivity Grip enhancer fit onto wine, champagne and cocktail glasses. It allows a better and more stable grip around the stem of the glass. Festivity suites a stem of 6-10 mm in diameter and that have a minimum height of 65 mm. Festivity can also be used as grip enhancer for Toothbrushes, Brushes, Cutlery, Pens, Make-up products and other items with thin handling grips. In these cases the items handle is brought down in to the Grip enhancer so it will be placed as shown in pic.4.

Material: PMMA/TPE
Hand wash
